DETAILED ACTION

Allowable Subject Matter

Prosecution on the merits of this application is reopened on claims 1-72 considered unpatentable for the reasons indicated below:

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-24, 40, 41, 50-54, 57, 58, 61-72 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by El-Rashidy et al.

El-Rashidy et al disclose a direct compression tablet for rapid release of fluoxetine (see Abstract). The tablet releases 50 weight percent of the fluoxetine present in about a minute (see col. 2, lines 17-18). Specific dosage and duration may vary by patient (see col. 3, lines 14-17). It is further disclosed that 10 mg may be administered as a precoital dose (col 3, line 30). Each tablet has 7.5 to about 15 mg of fluoxetine (see col. 2, lines 16-17). Incorporated by reference to its disclosure of fluoxetine use in treatment of premature ejaculation (See col. 1, line 58) , US Patent 5,151,488 discloses the use of parenteral administration such as suppositories, buccal, transdermal, capsules,

tablets and solutions (See col. 2, lines 643-67; col. 3, lines 1-8). The instant claims are clearly anticipated by El-Rashidy et al.

Claims 25-39, 42-49, 55, 56, 59-60 are objected to as dependent upon a rejected base claim.
